SUMMARY

Full Stack Developer with a passion for event-driven architecture and modern web technologies. I focus on building robust backends using **NestJS** and **Node.js**, leveraging **WebSockets**, **RestApi** and **Webhooks** to create interactive, real-time applications. With a technical background spanning **TypeScript** and **C#**, I bridge the gap between complex server logic and polished user interfaces in **React** and **React Native (Expo)**. I'm dedicated to writing clean, maintainable code that scales.

PROJECTS

Survey Builder

Full Stack Developer

- Developed both frontend and backend using NestJS, React, and TypeScript
- Designed and implemented APIs with Drizzle ORM and Turso
- Built a responsive survey builder with AI integration

Attendance System Mobile App (QR Code-Based)

Full Stack Developer

- Developed a QR code-based attendance system with real-time tracking
- Built the mobile app using React Native (Expo)
- Utilized Appwrite Realtime for instant attendance updates
- Designed backend logic and data handling for efficient check-ins

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, C#, JAVA

Frontend: React, React Native (Expo)

Backend: Node.js, NestJS

Database: MS SQL, Postgre, SQL

Concepts: REST APIs, WebSockets, Webhooks

EDUCATION

Bachelor of Science in Information Technology

2023 – Present

Pamantasan ng Lungsod ng Valenzuela

Information and Communications Technology
